1 Outline

Title	Change of Motor assembly with Air pipe assembly
Model	MP100D
Country	All countries
Description	[1][2] Air pipe assemblies for production have been unified to ø6mm thread type. [3][4] Motor assembly for production have been changed according to [1][2]. Note: There is no difference in performance between ø6mm thread type and ø8mm thread type. However, the repairs are different. See below.

2 Detailed information

ø8mm thread ø6mm thread

Current Air pipe assembly has either ø8mm or ø6mm threaded air pipe end as shown above.

⇩

New Air pipe assembly has the only ø6m threaded air pipe end.

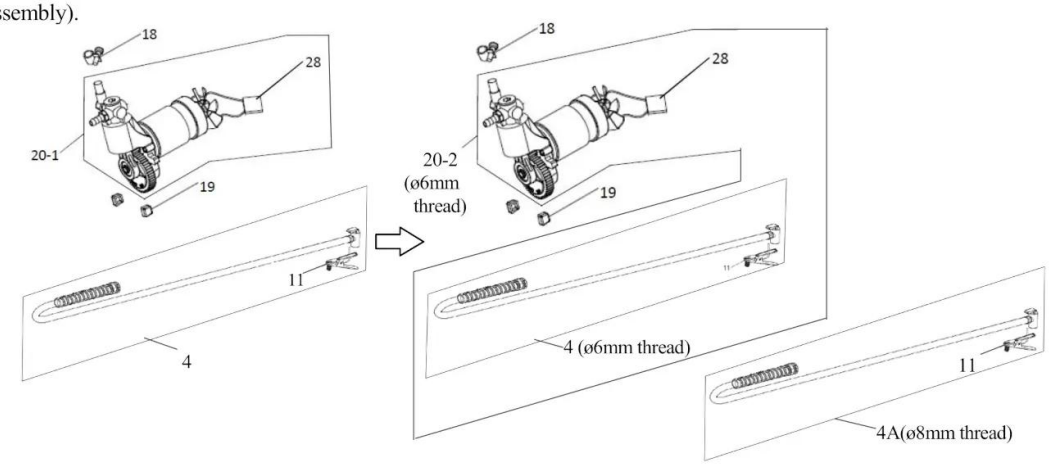

Current Motor assembly has either ø8mm or ø6mm thread joint portion.

⇩

New Motor assembly has the only ø6mm thread joint portion.

Only Air pipe assembly wants to be replaced;
Check the thread diameter of the machine that the customer repairs, and order the same Air pipe assembly.

Motor assembly wants to be replaced;
Because of parts unification to ø6mm thread type, order the new Motor assembly (with ø6mm thread Air pipe assembly).
